# Use Cases

—

# Use Case Diagram #1

Customer able to order food which includes

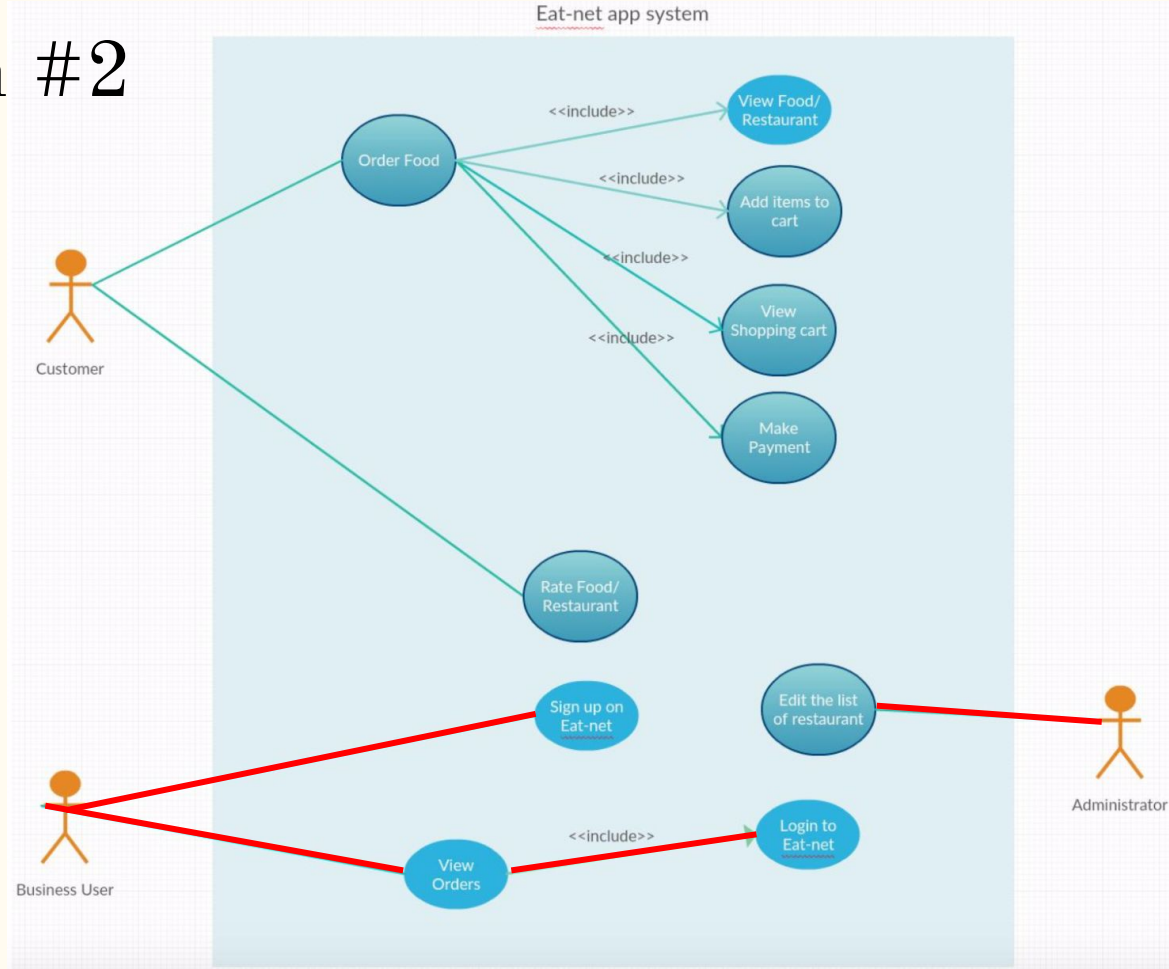

- view food list / restaurants
- Add items to cart
- View shopping cart
- Make payment

# Use Case Diagram #2

Business Users can

- view order list placed by consumers
- Registers restaurant
- Log-in to website
- Edit restaurant food list on website

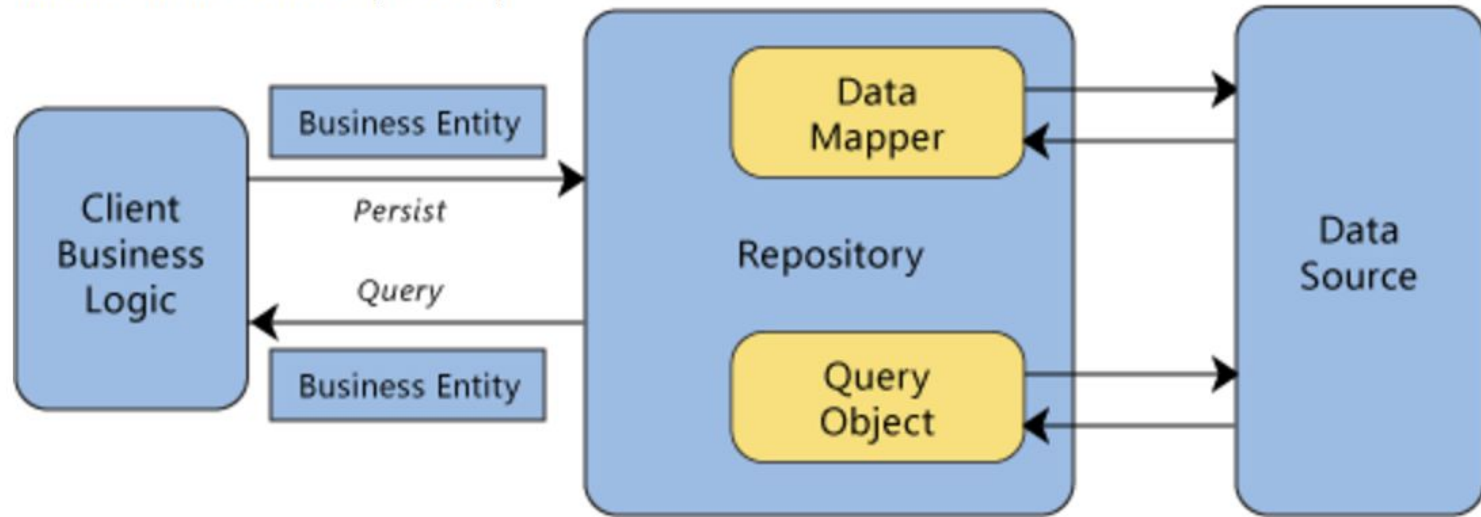

# Design Patterns

—

# The Repository Pattern

Interactions of the repository

# Class diagram for Repository Pattern

# Observer Pattern

- Implemented (partially) so that business user views are updated when new orders come in
- Requires page refresh
- Design pattern only partially implemented
  - Registering implied, always notify restaurant users of new orders

# Class Diagram for Observer Pattern
